- Taught weekly sections for 30+ data structures, algorithms, and object oriented programming principles in Java
- Proctored exams for 1000+ students to clarify confusing question and swiftly identify cases of academic dishonesty

Google

Mountain View, CA

Software Engineering Intern

May 2019 - August 2019

- Increased format diversity for ads on the play store by building infrastructure for sending and propagating format per requests
- Increased revenue by increasing user engagement through an improved play store experience

TECHNICAL DEVELOPMENT

OpenAux

Berkeley, CA

CoFounder and developer

August 2018 - August 2019

- Lead a team of 4 with the development of a mobile/web application aimed to allowing users to create live in person queues
- Synthesized data with open data sources to identify which location is ideal for particular artists to perform at
- Some tools/ APIs utilized were Android Studio, Firebase, Spotify Web APIs

CS370 Tutoring Application

Berkeley, CA

Scrum Master and Developer

January 2019 - May 2019

- Lead a team of 6 with the development of a tutoring application for the Director of Undergraduate Instruction at UC Berkeley
- Created an environment for growth by pairing programmers based on their strengths and needed areas for growth
- Learned the Ruby on Rails Framework to create and application to match qualified Berkeley Student tutors with students

Computer Security Project

Berkeley, CA

An End to End Encrypted File Sharing System

February 2019 - March 2019

- Designed and implemented a multi-user file sharing system that has confidentiality, integrity, and authenticity in Golang
- Some APIs utilized were the Google UUID library, a private keyStore, and several cryptographic hash function

CALNERDS

Berkeley, CA

Steminist Data Science Cohort

February 2019 - March 2019

- Learned how to properly gather data pertaining to the optimization of a business's internal processes
- Learned how to utilize various tools such as R and Tableau to gather, analyze and present data

OTHER SKILLS & INTERESTS

Computer: Adobe Applications (Illustrator & Photoshop), Microsoft Applications(Word, Excel, Powerpoint), Agile, Docker

Programming Languages: Python3, Java, C, Ruby, R, Golang, SQL, HTML, CSS, NodeJS, ReactJS, Scope

Interests: Entrepreneurship, Venture Capital, Product

Languages: Conversational Spanish, Beginner Korean
